

30. (Amended) The composite of claim 23 wherein the biopolymer structure is a composite of a biopolymer structure and [another] at least a second structure capable of forming a composite.

**REMARKS**

Preliminary to examination of this application, please cancel claims 11-14 and 17 and amend claims 27-28 and 30 as set forth above. Examiner rejects original claim 28 as amended to correct a misspelling of "matt". Applicant asserts that the specification describes a singular "matt" (p. 19, l. 5, 8, 9 and 25), and is specifically defined in line 13 (page 19): "'matt' refers to a biopolymer scaffold comprising a densely packed random array of biopolymer fibrils or bundles of fibrils or particles."

Applicant believes that the amended claims are fully supported by the application and claims as originally filed. Applicant respectfully submits that the foregoing amendments introduce no new matter. Entry of the foregoing Preliminary Amendment is thus in order and requested.

Respectfully submitted,  
TEI BIOSCIENCES, INC.
